AdvisAvia

WE ARE HONORED TO REPRESENT THE FOLLOWING INDUSTRY LEADERS:

Avionics

SA's services include avionics sales and avionics maintenance including repair and Overhaul capabilities.

SA also excels in avionics installation certification (EASA Part-21), design, documentation and certification of aircraft modifications as well as avionics engineering, installation & aircraft modification.

Other services offered include avionics technical training (EASA Part-147) as well as kit and electronics manufacturing (EASA Part-21G).

Laser Cleaning & Coating Ablation

Nuforj has developed a laser-based system for removing paint, coatings, corrosion, rust, etc... using a non-chemical, non-abrasive, non-corrosive, color selective process. It is FAA and Boeing approved. It is

environmentally and commercially superior to current methods which are unsafe to personnel and may damage the underlying substrate. It is effective on metals and composites and can be adapted to non-aviation applications.

Aviation Training

Gulf Aviation Academy offers a comprehensive range of structured IATA approved training programs and courses for all aviation

personnel. The diverse range of training programs in its portfolio are focused on providing its customers with quality, added value solutions.

SMS & QMS

ASQS provides aviation safety and quality management systems. ASQS' systems are in use with over 100

aviation companies globally. The systems are compliant with ICAO, IOSA, EASA and FAA requirements. ASQS also provides ICAO and EASA flight data monitoring services.

Secure Aircraft Tracking

Thompson Aerospace produces the only aircraft tracking system

available today which meets all ICAO and EASA requirements for aircraft tracking. The system also complies with the RTCA's recent data security recommendations. Additionally, the system provides virtual Flight Data Recorder capability and is able to transmit any elements from the aircraft's data bus.

Aviation Consultancy

Pegasus Aviation Advisors is a boutique advisory group providing exclusive strategic solutions to the aviation and air transport industry. Pegasus offers a

select team of senior individuals that have worked in aviation business development and infra-structure across the globe.

Maintenance Program

JSSI is the world's largest independent provider of hourly cost maintenance programs for aircraft engines and airframes.

Airborne POS

Northstar's Smart Retail point of sale solution is an on board

retail application designed to run on tablets, smart phones or all in one devices. The POS solution is available in iOS, Android and Windows.
